

# GRAVEL

We inventory a wide range of gravel, for a variety of applications. Each serves as an excellent support media for a mixed media filter system.

Our gravel consists of coarse aggregate in which a high proportion of the particles are rounded and tend toward a generally spherical or equidimensional shape. Precision sizing and uniform grading to close limits meet the rigid specifications of professional engineers throughout the world. The gravel is low in soluble impurities and it will maintain the quality of the treated water, especially in softeners.

The gravel we sell meets AWWA B100-96 specifications and is ANSI/NSF standard 61 certified.
